3-GIS | Web

Live

| Anytime, anywhere access	Easy to scale	Secure hosting platform

Keep your data backed up and secure

3-GIS | Live, the cloud-based deployment of 3-GIS | Web, offers the fastest route to production by immediately providing you with the infrastructure you need for the project at hand. Hosted in the Amazon Web Services (AWS) world-class, secure cloud platform, Live offers easy scalability at a moment's notice, relieving your team of hardware maintenance, server configuration, data backups, and IT upkeep, so you can focus your attention on your fiber network.

About 3-GIS | Live

3-GIS | Live is the recommended deployment solution of the 3-GIS software suite for enterprises looking to get up and running faster, with direct access to the latest releases, training, maintenance, and available support. Capture accurate live field data, keep teams in sync, and leverage easy-to-use administration and reporting, all from a powerful web-based architecture hosted in a secure cloud environment. Unsurpassed uptime and security keep your data accessible to those who need it, off-loading the need to manage your own IT infrastructure.

About AWS

AWS is the world's most comprehensive and broadly adopted cloud platform, used by millions around the world, from large enterprises to government agencies. It is designed to be the most flexible and secure cloud computing environment available today, offering unsurpassed 99.9% uptime and over a decade of proven global operational expertise.

10/2022

Key features

- > Fastest on-ramping
- > Proven infrastructure architecture
- > Best for scalability
- > Regional servers / global server network
- > Streamlined updates
- > Faster configuration assistance

- > Most secure solution
- > Expert support access
- > Quicker troubleshooting
- > Automated software updates
- > Regular backups

Service security and compliance

In order to support requirements for security groups (virtual firewall) advanced encryption, subnets, IAM, VPC (including ingress and egress controls), 3-GIS | Live, hosted on AWS, is aligned and compliant with applicable regulations and standards including ISO/IEC 27001/2. We utilize relevant standards accordingly as we configure our solutions in the AWS cloud infrastructure.

About us

3-GIS, an SSP Innovations company, empowers companies to achieve better operating efficiencies and to meet the challenges of building increasingly complex fiber networks. 3-GIS uses a data driven approach based on geospatial reference, rules-based calculations, mobility, and web-based services to revolutionize the potential and realize the market opportunities of fiber assets. Our fully-configurable solutions allow users to plan, design, and manage networks; provide real-time data that is used enterprise-wide; and enable automation for faster service activation, in one seamless system. The company has development, design services, product support, and operational staff in five countries challenging the status quo every day to improve the economic visibility of fiber networks; creating a more connected, informed, and lighted world.
